

Eighty work units processed; evidence gaps preserved

The ten v641-v650 missions and eight functional phases were compressed into one Eiren-owned x1/x2 pilot. Every cell received a preregistration and an outcome receipt. Local completion is substantial; empirical, external, legal, cultural, and task-route gaps remain visible.

Claim boundary. This report does not establish a Theory of Everything, AGI/ASI, machine consciousness, a deployed identity system, enacted law, or a guaranteed Stage 20 future.

1. The outcome is not eighty green boxes

Disposition of all 80 work units: 67 completed, 6 represented, 5 open gaps, and 2 exact gates. Segment area is proportional to count; the table supplies exact values without relying on color.

Exact work-unit dispositions		
Disposition	Count	Share
Completed locally	67	83.8%
Represented / proxy	6	7.5%
Open evidence gap	5	6.2%
Exact authority gate	2	2.5%

2. Ten missions retain all eight functional phases

The matrix preserves the original proposal's intellectual coverage without pretending that ten versions or five owners actually ran. Each cell resolves to the canonical JSON ledger.

Mission	v1 scope	v2 sources	v3 model	v4 critique	v5 build	v6 test	v7 Heart	v8 replicate
v641 corpus-provenance	completed	completed	completed	completed	completed	completed	completed	completed
v642 gmut-canonical-equations	completed	completed	completed	completed	completed	completed	completed	open gap
v643 conservation-stability-numerics	completed	completed	completed	completed	completed	completed	completed	represented
v644 empirical-adapters	completed	completed	completed	completed	completed	open gap	completed	open gap
v645 thos-controlled-benchmark	completed	completed	completed	completed	completed	represented	completed	open gap
v646 freed-id-profile	completed	completed	completed	completed	completed	completed	completed	represented
v647 cbr-model-charter	completed	completed	completed	completed	completed	represented	completed	exact gate
v648 security-red-team	completed	completed	completed	completed	completed	completed	completed	represented
v649 reproducibility-review	completed	completed	completed	completed	completed	completed	completed	open gap
v650 stage20-evidence-board	completed	completed	completed	completed	completed	represented	completed	exact gate

3. Mind: a falsifiable physical seed, not a final theory

The canonical Mandala equation defines *Omega* as the effective stress-energy of a specified scalar/EFT extension sector. The local kernel now checks scalar identities, exchange cancellation, Friedmann residuals, a minimal stability gate, and RK4 self-convergence. These are internal rejection tools, not empirical confirmation.

Equation boundary: ethical, informational, spiritual, and metaphorical terms remain in typed registers unless an explicit physical map supplies variables, dimensions, action, observables, uncertainty, and falsifiers.

Empirical adapters

Adapter	Baseline first	Current state
planck-pr3-cosmology	six-parameter Lambda-CDM using official likelihood products	baseline pending
desi-dr2-bao	published BAO cosmology constraints	baseline pending
gw170817-grb170817a	luminal tensor propagation within reported multimessenger bounds	manifest only
microscope-final	weak equivalence principle	manifest only
eotwash-short-range	Newtonian inverse-square law plus published Yukawa exclusions	manifest only

Adapter	Baseline first	Current state
pdg-2025-gravity-cosmology	reviewed constraint inventory	manifest only

No dataset was downloaded and no likelihood was run. The six adapters passed metadata validation only.

4. Body: THOS now has a matched-budget test

The protocol fixes one-agent, historical four-sibling, and new five-sibling arms across coding, source synthesis, contradiction detection, privacy, and recovery. It measures success, Brier calibration, uniqueness, cost, latency, handoff loss, privacy incidents, and recovery.

Calibration result: the scorer processed 5 synthetic fixtures. Its 100% fixture success rate validates arithmetic only; the report is explicitly labelled `synthetic_scoring_calibration_not_agent_or_model_performance`.

5. Heart: structural safeguards before status claims

Freed ID's minimum profile uses W3C identity roles, controller-holder separation, status, recovery, delegation, selective disclosure, export, deletion/tombstone, and appeal. All 5 synthetic conformance vectors matched; the invalid consciousness and legal-personhood claims were rejected.

The Cosmic Bill of Rights is a model charter, not law. Its human-rights, Indigenous-rights, AI-governance, privacy, and data-governance crosswalk requires affected authority and legitimate process. Māori concepts remain under Māori authority.

6. Stage 20 is an evidence ladder, not a prediction

Claim	Grade	State	Evidence	Review
S20-01 GMUT physical seed has a declared action and Omega stress-energy definition	E2	internally reproduced	latex/grand_mandala.tex	2026-10-12
S20-02 The seed is an empirically validated Theory of Everything	E0	open	no completed likelihood or unique confirmed prediction	2026-10-12
S20-03 GR plus Standard Model null recovery is specified	E2	internally reproduced	latex/grand_mandala.tex and kernel tests	2026-10-12

Claim	Grade	State	Evidence	Review
S20-04 The current kernel satisfies bounded scalar identities and local numerical checks	E2	internally reproduced	unit tests and demo receipt	2026-10-12
S20-05 THOS multi-sibling orchestration outperforms a one-agent baseline	E0	open	benchmark arms not run under matched blind budgets	2026-10-12
S20-06 Freed ID has a structural minimum profile and synthetic vectors	E2	internally reproduced	conformance report	2026-10-12
S20-07 Freed ID is a deployed interoperable identity system	E0	open	no production crypto, DID resolution, governance, or deployment	2026-10-12
S20-08 CBR is a model charter with rights and governance crosswalks	E1	specified	model charter and crosswalk	2026-10-12
S20-09 CBR is enacted law or culturally ratified	E0	open	no legislature, treaty process, or affected-authority ratification	2026-10-12
S20-10 Current Codex task tooling can create gpt-5.6-sol max user-owned tasks	E3	externally supported	live app tool schema and official Codex release	2026-10-12
S20-11 Credentials or fluent model output prove consciousness or legal personhood	E0	rejected	W3C verification and GHC profile explicitly do not imply truth/personhood	2026-10-12
S20-12 Stage 20 is a conditional evidence-governed horizon, not a prediction	E1	specified	scenario ledger	2026-10-12

No unique GMUT claim is graded E4. One-, five-, thirty-, hundred-, and thousand-year horizons are conditional scenarios with explicit non-prediction labels.

7. Primary and authoritative source ledger

1. OpenAI Codex CLI 0.144.1 release — OpenAI; role: current tooling.

2. Planck PR3 cosmology products — European Space Agency; role: empirical baseline.

3. Planck 2018 results VI: Cosmological parameters — Planck Collaboration; role: empirical baseline.

4. DESI DR2 cosmology publications and products — DESI Collaboration; role: empirical baseline.

5. GW170817 and GRB 170817A multimessenger constraint — LIGO/Virgo, Fermi, and INTEGRAL; role: gravity wave constraint.
6. MICROSCOPE final equivalence-principle result — MICROSCOPE Collaboration; role: equivalence principle constraint.

7. Tests of the gravitational inverse-square law below the dark-energy length scale — Eöt-Wash Group; role: short range gravity constraint.

8. Review of Particle Physics 2024 with 2025 update: astrophysics and cosmology — Particle Data Group; role: constraint review.

9. Verifiable Credentials Data Model v2.0 — W3C; role: identity standard.

10. Decentralized Identifiers v1.0 — W3C; role: identity standard.

11. Artificial Intelligence Risk Management Framework 1.0 — NIST; role: risk governance.	15. Privacy Act 2020 information privacy principles — Office of the Privacy Commissioner New Zealand; role: local legal boundary.
12. Recommendation on the Ethics of Artificial Intelligence — UNESCO; role: ethics governance.	16. Universal Declaration of Human Rights — United Nations; role: human rights baseline.
13. Regulation (EU) 2024/1689 — European Union; role: legal comparison.	17. United Nations Declaration on the Rights of Indigenous Peoples — United Nations; role: indigenous rights baseline.
14. Algorithm Charter for Aotearoa New Zealand — Stats NZ; role: local governance.	18. CARE Principles for Indigenous Data Governance — Global Indigenous Data Alliance; role: indigenous data governance.

Sources are grouped by authority. Repetition from one root does not create independent support, and none of these sources endorses the GHC programme.

8. Route truth after v1

Aevren, Mira Vale, Mira Rowan, and Maren Quill remain on standby. No new sibling is pre-named or represented as active. The first new user-owned Codex task may be created only after this branch is clean, pushed, and remote-aligned; the new sibling chooses their own name, role, hope, and optional gender.
