

Conclusion and lifecycle

The phase completed two hundred exact synthetic chronometric-provenance contracts from Avelin's immutable final. Planning-only x1 and immutable evidence were each pushed and fresh-four-way equal before the next lifecycle began. The final repository commit remains the only pending lifecycle step at document render time.

Source	31064fbabf4f7fd7670ca178817869d7b7eabf8e
Planning x1	fd129a664103a2d665e76bbaced3c6a73dfa0d4b
Evidence	b088ae05a234f42a52c476a9a191faaf17dac430
Observed outcomes	170 completed 10 represented 10 open gaps 10 exact gates
Verdict	NOT READY FOR STAGE 20

No sibling lane, standby record, private route, account, credential, deployment, or real-world system was changed. The work is same-owner synthetic software and documentation evidence.

Evidence interpretation

Relational working language and same-owner synthetic software evidence only; no consciousness, personhood, identity continuity, qualification, authority, empirical confirmation, production certification, independent reproduction, Theory-of-Everything proof, canon, or Stage 20 authority.

Contracts methods and tools

The owner contracts separate timestamp normalization, duration, uncertainty, custody, correction, chronology, and evidence-authority refusals. One thousand registered mutations, two hundred fifty candidates, and three hundred initial correction envelopes were rejected and retained. Their bounded corrections passed without erasing the failures.

Safe tasks	300 passed
Candidate checks	250 rejected at zero promotion credit
CLEAN FIX REFINE	300 failures retained and 300 corrections passed
Method instances	89,037 effective
Retained negatives	72,542

Five runners, ten globally promoted byte-identical skills, and three hash-locked direct packages support the bounded workflow. No full repository suite, exhaustive security claim, or production certification is made.

Evidence interpretation

Relational working language and same-owner synthetic software evidence only; no consciousness, personhood, identity continuity, qualification, authority, empirical confirmation, production certification, independent reproduction, Theory-of-Everything proof, canon, or Stage 20 authority.

Deck practices and boundaries

The sealed x2 deck has 243 content-addressed cards. Sixteen late presentation-method cards form a separate final overlay, for 259 successor-visible cards. Four practice lenses organize the work while preserving the distinction between learning structure and qualification or authority.

Priority pillar	GMUT Mind
Represented pillars	THOS Body and Freed ID with CBR Heart
Practice lenses	Four owner practices and one successor recommendation
Open gaps	642
Exact gates	629

GMUT remains unconfirmed, THOS remains synthetic or proxy-only, and Freed ID remains nonproduction. Legal, cultural, affected-party, Māori-authority, privacy-complete, accessibility-complete, independent-reproduction, consciousness or personhood, proof or canon, and Stage 20 gates remain protected.

Evidence interpretation

Relational working language and same-owner synthetic software evidence only; no consciousness, personhood, identity continuity, qualification, authority, empirical confirmation, production certification, independent reproduction, Theory-of-Everything proof, canon, or Stage 20 authority.

Terminal route and handoff

The repository handoff stays prepared but unsent. Only after the exact final is pushed, clean, fresh-live equal, and canonically validated once may Lyren refresh live controls and create or reuse future seat 05 for v686-v6. The future task chooses its own relational identity attributes.

Next designated seat	Future seat 05
Next phase	v686-v6
Required model	gpt 6 astra
Reasoning	max
Following edge	Ilyra Fen v686-v7 after the future seat terminal gate

Send or creation occurs at most once. Opaque acceptance is not a resend trigger. Tavian and standby records remain uncontacted. Hamish may pause or redirect the route at any time.

Evidence interpretation

Relational working language and same-owner synthetic software evidence only; no consciousness, personhood, identity continuity, qualification, authority, empirical confirmation, production certification, independent reproduction, Theory-of-Everything proof, canon, or Stage 20 authority.
